AccessBase and AccessBase 2000 for Energy Policy Act of 2005

1. Background

On August 8, 2005, President George W. Bush signed the *Energy Policy Act of 2005*. This Act changed the time change dates for Daylight Saving Time in the U.S. Beginning in 2007, DST will begin on the second Sunday in March and end on the first Sunday in November.

AccessBase V1.54 and AccessBase 2000 V2.6 have been released to support this Act.

The firmware in the controller does not need to be updated to support the Act. All time adjustment for DST will be performed by AccessBase application instead of the firmware in the controller.

2. Windows OS Update for 2007 DST Changes

To support *Energy Policy Act of 2005,* Windows Operating System needs to be updated.

Please consult with Microsoft website to have your Windows Operating System updated. Microsoft document "Preparing for daylight saving time changes in 2007" can be found at: <u>http://www.microsoft.com/windows/timezone/dst2007.mspx#top</u>.

Alternatively, all versions of Windows can be manually updated using the <u>tzedit.exe</u> utility or other techniques documented in Microsoft's Knowledge Base article <u>914387</u> and similar articles for other countries, which is the preferred method of remediation for any product outside of Microsoft's Mainstream Support.

😚 Windows Time Zone Editor	
Time Zones:	Cancel
(GMT-04:00) Santiago	Edit
(GMT-05:00) Eastern Time (US & Canada) (GMT-05:00) Indiana (East)	New
(GMT-06:00) Central America (GMT-06:00) Central Time (US & Canada)	Delete
(GMT-06:00) Guadalajara, Mexico City, Monterrey (GMT-06:00) Saskatchewan (GMT-07:00) Arizona	Help
(GMT-07:00) Chibuahua, La Paz, Mazatlan	About
(GMT-07.00) Mountain Time (US & Canada) (GMT-08:00) Pacific Time (US & Canada); Tijuana	
Daylight Saving Time	
Start Date/Time: Second Sunday of March at 2:00:00 AM	
End Date/Time: First Sunday of November at 2:00:00 AM	

When tzedit.exe is executed, the following dialog box is displayed:

The user can select the time zone to be edited by clicking the Edit button. From the Edit Time Zone dialog box, the Start Day and Last Day of the Daylight Saving Time may be changed to comply with *Energy Policy Act of 2005*.

🎯 Edit Time Zon	e	\mathbf{X}
Time Zone Name:	(GMT-08:00) Pacific Time (US & Canada); Tijuana OK]
Abbreviation:	Pacific Standard Time Cancel	
Offset from GMT: [-8 : 00 📕	
Automatical	lly set Daylight Saving Time	
Start Day: Secon	nd 💌 Sunday 💌 of March 💌 at 2:00:00 AM 🖨	
Last Day: First	▼ Sunday ▼ of November ▼ at 2:00:00 AM ₹	
Abbreviation: Pa	acific Daylight Time Daylight Bias: +1 : 00 🖨	

If your installation has networks residing in different time zones than the PC, the DST definition for the network's time zone also needs to be edited.

3. Windows Vista Compatibility

Linear is currently reviewing the compatibility of AccessBase and AccessBase2000 running on computers using the new Windows Vista operating system. AccessBase V1.54 and AccessBase2000 V2.6 have not been tested for Vista compatibility. When the review has been completed, the results of the compatibility review will be posted on Linear's website www.linearcorp.com.

4. AccessBase Software Installation

AccessBase installation package will detect the presence of the old version software and prompt the user to uninstall the old version. The user should click the Remove radio button and click on Next button.

Install Shield will prompt the user to confirm the removal of the old version.

AccessBase2000 - InstallShield Wizard
Do you want to completely remove the selected application and all of its features?

After AccessBase is successfully uninstalled, Install Shield will display a message box to confirm that AccessBase was successfully removed.

After the old version is successfully uninstalled, the user must re-run the installation package again to install the new version. Install Shield will display the following welcome dialog box when it starts the installation.

AccessBase2000 - InstallShield Wizard		
	Welcome to the InstallShield Wizard for AccessBase2000 The InstallShield® Wizard will install AccessBase2000 on your computer. To continue, click Next.	
InstallShield	< Back Next > Cancel	

After the user clicks the Next button, Install Shield will prompt the user to select the features that is to be installed.

5. Network Setup

If the network resides in a time zone that observes DST, the check box for Enable Daylight Savings should be checked. If the network does not observe DST, the check box should be unchecked.

Edit the settings for this network

How to connect to network —			
Connect using: Phone number COM4 Image: Use country code and area code			
	Country code: United States (1)	-	
ļ	Phone number:		
Name	Type D)irection	

6. Synchronizing Time with the Controllers

There are several ways that the user may use to synchronize the panels to the new time to observe the new DST schedule:

 The user may start the AccessBase application the night before DST state change will take effect, connect to the networks and leave the application running overnight with networks connected. The software will detect DST state change and automatically send new time to all the networks in the installation. The networks have to be connected when this method is used.

The following dialog box will be displayed when the application sends date and time to the network.

DST Chang	ed, installation time sent 🛛 🛛 🔀
Đ	The application has detected Daylight Saving Time change in your installation. Updated date and time has been sent to the networks.
	ОК

2) In the case that the user has started the AccessBase application after DST change has taken effect, the application will detect the fact that DST state has changed since the application was run last time and request the user to connect to the networks so that new time can be sent to the networks.

AccessBase 2000		
⚠	Daylight Saving Time has changed since the last time the application was run. Updated date and time will be sent to the networks automatically after the networks are connected. Please connect to the networks.	
	ОК	

- 3) The user may use the Windows Task Scheduler to schedule a task to run AccessBase application to automatically send time to the networks at a scheduled date and time. For example, a task schedule can be set up to run AccessBase application with the "\T" option at 3:01 A.M. on the date that DST change will take effect, e.g., 3:01 A.M. March 11, 2007 or 2:01 A.M. November 4, 2007.
 - Note: When using this method, it is important that the Program Network button is NOT highlighted when AccessBase is closed. If the Program Network button is highlighted when AccessBase is closed, the subsequent "\T" task will cause the application to program the network, connect to the network and send all commands in the queue without sending date and time. Linear is aware of this restriction and working on improvement to remove this restriction.

To setup a scheduled task, the user should open up windows Control Panel via Start->Settings->Control Panel.

If the Control Panel is displayed in classic format, the user should double click on Scheduled Task icon.

If the Control Panel is in Category View, the user should click on Performance and Maintenance icon.

After Scheduled Tasks dialog box is displayed, double click on Add Scheduled Task to add a task. From this dialog box, the user can also edit previously added tasks.

Scheduled Task Wizar	d	×
	This wizard helps you schedule a task for Windows to perform. You select the program you want Windows to run, and then schedule it for a convenient time. Click Next to continue.
