Programming Basics-

The Crown Jewel can be programmed 2 different ways:

- 1. Crown Jewel Keypad: You may used the keypad on the front panel.
- 2. Local/Remote DTMP Phone: You may use the keypad on a local or remote phone to program the system. The unit response to the DTMF signals generated by your touch-tone phone.
- 3. *Modem Connection to a PC:* In order to program the Crown Jewel with a modem connection, your PC MUST be running Sentex's Windows[®]-compatible CJWIN software. *(See CJWIN Programming manual for more information.)*

The instructions in THIS manual will describe how to program the Crown Jewel from the keypad or local/remote DTMF (Touch-Tone) phone ONLY. For More information check with your installation dealer.

Example: Procedure for Programming the Crown Jewel

- 1. 2 digit # Programming Number. (See Quick Reference on pages 2-3 for descriptions and procedures.)
- 2. One or more Data Fields.
- 3. Pound Key (#) at end of the programming sequence to Save the Data.
- NOTES:
 - If you make an error during and entry, press the asterisk key(*) to cancel the step.
 - When you correctly enter the entire programming sequence, the unit will respond with 2 short beeps (See System Feedback/Responses (Beeps) see below).

System Feedback/Responses (Beeps)

Programming Responses:

2 Short Beeps:	Programming step was valid.
3 Short Beeps:	Programming step was exited.
1 Long Beep:	Input was not valid.
2 Long Beeps:	Duplicate entry code was entered.
3 Lona Beeps:	Memory is full.
4 Long Beeps:	Unit has reset or is powering up.
Busy Signal:	Line is busy or Do Not Disturb feature is in effect.

Direct Command Responses:

5 Short Beeps:	Gate is closing by command.
10 Short Beeps:	Gate is opening by command.

Other Responses:

1 Short Beeps:	Key was pressed on the main keypad.
10 Beeps:	Talk time for a visitor call is ending. The unit will begin to beep when 10 seconds of talk time
	remain, beeping once every second.
Ring Back:	The unit is ringing the house.
High-Low Tones:	An alarm condition has been activated.
Silence:	The keypad has stuck out, unit is being programmed remotely, or an alarm condition exists.

Enter Programming Mode - ***

.....

1. Press 🗶 🗶
2. Enter the (6) six-digit password. The default is 10 10 10 10 10 10 2 <i>Short Beeps</i>
The unit is now ready to accept programming instructions.
From the Residence Telephone
1. When you hear a dial tone, press 🔫 📯 📯
1A. If multiple Crown Jewel units are sharing the same phone line, then a Unit ID Code (1-7) MUST
be entered at this time.
NOTE: The default setting for each Crown Jewel unit is Unit #1. See page 27 for more information about Multiple Unit Sites
2. Enter the (6) six-digit password. The default is 60 60 60 60 60 60
The unit will emit a high-pitched tone.
3. Press # and the tone will stop.
The unit is now ready to accept programming instructions.
Single Unit
Example: ****
Linit is ready to secont programming instructions
Multi-Unit
Example: $\begin{array}{c c} \times & \times & 4 \\ 1 \\ 1 \\ 1 \\ 1 \\ 1 \\ 1 \\ 1 \\ 1 \\ 1 \\$
Unit #4 (Data field "1A" specifies unit to be programmed) is ready to accept programming instructions.
From a Remote Telephone
1. Dial the residence telephone number
NUIE: If the Crown Jewel unit and an answering machine (or answering service) utilize the same telephone line, let the line ring at least (2) two times, hang-up and call back within (1) one minute. The Crown Jewel unit will answer on the second call. If the unit does not answer, you may need to change the ring count (see Set Visitor Ring Sound on page 1)
When the Crown Jewel picks up the call, you will hear 2 short beeps
2. Press $- \times$ $- \times$ $- \times$
2A. If multiple Crown Jewel units are sharing the same phone line, then a Unit ID Code (1-7) MUST be entered at this time. (See page 27 for more information about Multiple Unit Sites)
3 Enter the (6) six-digit password. The default is
The unit will emit a high-pitched tone.
4 Press 4 and the tone will stop
The unit is now ready to accept programming instructions.
Single Unit Example: 5 5 1 2 3 $High pitch tone stops.$ 123
Multi-Unit
Example: 5 5 1 2 2 2 2 2 A O O O # High pitch tone stops
Unit #4 (Data field "2A" specifies unit to be programmed) is ready to account programming instructions

Exit Programming Mode - 00	
• Press 1 1 1 on the Crown Jewel keypad and the unit will respond with <i>3 short beeps</i> when	disconneting.
• Press 0 0 # on the telephone and the unit will respond with <i>3 short beeps</i> when discor	nneting.

Configure Relays

A relay is a device that reacts to an electric current to activate other devices. Allowing the Crown Jewel to lock or unlock a gate, shut (bypass) alarm contacts, signal an alarm, or turn on a camera wired to a closed-circuit television (CCTV). The relays can be programmed to 5 different modes.

MODES OF OPERATION

Strike Relay:	A Strike Relay controls a door or gate by unlocking or opening it. It does not control any other
	component associated with a system like alarms, CCTV, etc.

- Shunt Relay: A Shunt Relay is normally wired to an alarm and works with strike relays to shunt (bypass) the alarm when the door is opened with a valid access code. If the door is forced open, the system will not shunt the alarm and the alarm will be triggered.
- **CCTV** Relay: A CCTV relay activates the system's optional camera. The camera is wired to a closed-circuit television (CCTV). A camera can be activated when an alarm condition occurs or when a resident enters a valid access code.
- The Alarm Relay will activate another device, such as a siren, when 3 conditions occur: A door is Alarm Relay: opened without a valid access code. A door is open past the allotted time programmed in, or too many invalid codes are tried. Any of these will trigger the alarm relay.
- The Control Relay can control another device such as an outdoor or indoor light near the unit. For Control Relay: example, you can configure the system to run an entry light through a darkened area after a resident enters a valid access code. Then the light would turn off after a specified amount of time.

Configure Relay #2 and Status #2 Input - 26

Relay #2 can be configured as a Strike, Shunt, CCTV, Alarm or Control Relay. The Status 2 input can be used as an exit request for the second gate or sensor to detect the closed position of the main gate/door.

FACTORY SETTING: 0 (Relay 2 = Control Type; Status 2 = Exit Request.)

NOTE: Relay #1 is configured as a Control Relay and cannot be changed.

2. Enter Configuration Number:

- **0** = Relav #2 = Control Type; Status 2 = Exit Request 2 (During a visitor call, Relay #2 will activate when the #5 is press from the resident phone, or the relay will activate when the Exit Request Device has been activated.)
- 1 = Relay #2 = Shunt Type; Status 2 = Position Sense 1 (Relay #2 will activate whenever Relay #1 activates to bypass an alarm sensor.)
- 2 = Relav #2 = Alarm Type: Status 2 = Position Sense 1(Relav #2 will activate upon an Alarm Condition.)
- 3 = Relay #2 = CCTV Type; Status 2 = Position Sense 1; Video On = Manual (Closed-circuit TV will activate when the #5 is pressed from the resident phone. however, the visitor call will not terminate until access is granted "#9" or call is terminated "*".
- **4** = Relay #2 = CCTV Type: Status 2 = Position Sense 1; Video On = Immediate (Closed-circuit TV will activate when any key is press on the main keypad.)
- **5** = Relay #2 = Control Type; Status 2 = Position Sense 1 (During a visitor call, Relay #2 will ONLY activate when the "#5" is press from the resident phone.)

3. Press

to save the data

Sets Relay #2 as an Alarm Type and Status 2 for Position Sense 1)

Set Relay Activation Times - 23 and 24

Entry Codes

Entry codes are used to open the gate or door using the Crown Jewel keypad without phoning the residence. The Crown Jewel unit can store up to 75 entry codes. To restrict access, you can also program entry codes to activate specific relays and/or grant access during specific Time Zones (Schedules) see page 11. Entry codes are four digits long between 0000 and 9999.

database.

Time Zones (Schedules) and Holidays

Set the Date and Time - 28

Create a Time Zone (Schedule) - 25

Time Zones (Schedules) allow you to create time periods to grant or deny access to a residence. Time Zones may be assigned to an entry code or relay. You can program 7 Time Zones with 2 Segments for each.

Sets Time Zone #5, Segment #1 to start at 8:00 AM and end at 8:00 PM, Monday, Wednesday and Friday. **NOTE:** To set up a time zone that extends past midnight and into the next day, create one segment that runs until midnight (i.e. 8:00 PM [2000] to 11:59 PM [2359]) and a second segment that starts at midnight on the following day (i.e.: 12:00 AM [0000] to 4:00 AM [0400]).

Create a Holiday - 28

Holidays are special calendar dates that can be used to modify the Crown Jewel's functionality. (i.e. Do Not Disturb (DND) Schedules, Gate Unlock Schedules, Time Zones and Entry Codes).

Do Not Disturb (DND) Schedules

Do Not Disturb (DND) Schedules prevent visitors from calling the residence phone during a specified time. This feature is ONLY available to the main residence phone, not to other tenants via Dialing Codes.

Create a Do Not Disturb (DND) Schedule- 11

Enable/Disable Do Not Disturb (DND) Schedule - 12

Manually Activate the Do Not Disturb Feature - 89

Auto Unlock Schedules

The Crown Jewel can automatically active either of it's two relays. Each day of the week can have up to 2 time segments. On programmed holidays, the schedule can automatically be ignored or changed to the alternate holiday schedule.

Set Auto Unlock Schedules- 41 & 42

Delete Auto Unlock Schedules- 41 & 42

Enable/Disable Auto Unlock Schedules- 40

Call Forwarding

The Call Forwarding feature redirects visitor calls to an outside telephone number instead of ringing the house. The forwarding number is a regular phone number of up to 12-digits in length. You may also attach one of the following features to a forwarding number:

- An extension of an automated switch board
- An extension (up to 6 digits) that the visitor can dial from the unit's keypad.

Setting the Call Forwarding Number - 14

NOTE: During a Call Forwarding call, the visitor will hear normal telephone line sounds, however, they will not hear the number being dialed.

Delete Call Forwarding Number - 14	
1. Press	
2. Enter "00"	
3. Press #	

Enabling/Disabling Call Forwarding - 13

Setting the Call Forwarding Extension - 16

When the Call Forwarding feature is enabled, the Crown Jewel is able to dial an extension number (up to 6-digits).

Setting the Call Forwarding Extension Delay - 15

Set the Call Forwarding Schedule - 18

Visitor Calls

When a visitor contacts a resident with the Crown Jewel, the resident can preform various functions using their touch-tone phone. The default settings are as follows:

KEYS ON RESIDENT'S TELEPHONE

Activates Relay #1

Activates Relay #2

Toggles Between Visitor and Another Phone Call

Extends Talk Time

Hang Up and Deny Access to the Visitor

Set Max Visitor Call Ring Count - 12

Set Visitor Talk Time - 90

Enable/Disable Pulse Dial Activation - 09

You can enable a resident's pulse (rotary) telephone to activate Relay #1 by dialing "9". Pulse dialing CANNOT be used for any other direct commands, programming or visitor responses. *FACTORY SETTING:* 0 Disabled

Enable/Disable Call Waiting - 10

NOTE: This feature applies only to calls made to the main residence phone, not to other tenants via dialing codes.

Visitor Calls to Other Tenants (Dialing Codes) - 19

This feature allows a visitor to place a call to a location other than the main residence by pressing 1#, 2# or 3# on the Crown Jewel keypad.

Set Maximum Number of Digits Visitor May Dial - 17

Direct Commands

Unit MUST be in programming mode in order to use Direct commands.(For information about using direct commands from a resident's phone see pages 23-24.

Direct Commands - 98-99

Direct Commands from Resident's Phone

With the Direct Command feature, you can perform various functions (e.g., unlock a door) from you phone. This feature is ONLY available for a single family residence or a manager's phone sharing a phone line with the Crown Jewel.

The following commands are carried out by simply picking up the residence telephone and dialing the following key combinations.

IMPORTANT NOTE: These steps will override any existing unlock schedules for the day they are entered.

NOTE: Some areas of the country have a phone company that makes use of the "#" or "*****" key as a code to invoke a special function. If this is true of your area, you can choose an alternate direct command prefix that uses a number followed by a "#" key. If you wish to uses this feature, please refer to Setting Alternate Prefixes, page 29.

EXAMPLE B:	# P 1 2 s relay #1 open.	

Various Direct Commands from the Resident's Telephone - 98 & 99

Multi-Unit Sites and Direct Commands from the Resident's Telephone

Security Features

Change the Unit Password - 01	_
1. Press 0	
2. Enter new Password (Must be 6 digits)	
3. Press #	
EXAMPLES: 0 1 2 3 4 5 6 #	
Changes the unit password to # 123456.	

Verify Unit Password - 02

Set Maximum Number of Keypad Errors - 20

Using the In-House Paging Feature - ##0

EXAMPLES:	#

Sets the Crown Jewel Keypad so it will stop accepting codes after 3 unsuccessful attempts.

Speak Through the Crown Jewel Speaker - 90

This direct command allows the user to speak though the Crown Jewel speaker to greet visitors, ward off vandals, etc.
1. Press *from* the residence phone. The unit is now prepared to accept a direct command.
2. Press *form* the residence phone.
3. Press *form*This terminates automatically in 60 seconds unless you hang up the line sooner. You can extend the talk time by pressing "1" on your phone.

Multiple Unit Installations

Up to seven (7) Crown Jewels can be installed on a single telephone line. Each unit must have a unique number from 1-7. Visitor calls can only be taken one at a time. For example: if you take a visitor call from the main gate (unit #1) and a visitor attempts to call from a rear gate (unit #2), you will not be notified until the first call is disconnected. However, if you are making a regular phone call, the call waiting feature will operate normally.

Programming Multiple Units

When you program the Crown Jewel from the residence telephone or a remote telephone, you MUST include the unit ID code.

Set the Unit Number- 38

2. Press

Adding or removing Crown Jewels will require the Unit ID's to be re-entered. The Unit ID can ONLY be programmed using the Crown Jewel keypad.

The unit will respond with the number of beeps corresponding to its unit number.

Other System Settings

Rings Before Answer - 29

Sets the number of rings before the Crown Jewel will answer a call from a remote telephone. If you have an answering machine (or answering service) attached to the same telephone line as the unit, set the Crown Jewel count for two (2) or more rings higher than the answering machine/service count. *FACTORY SETTING:* **5 Rings**

1. Press 2 9	EXAMPLE: 2 9 6 #)
2. Enter Number of Rings (1-19)		
3. Press #	The Crown Jewel unit will answer the call after 6 rings from a remote telephone.	J

Set Alternate Prefix - 36

When you press either "##" or "QQQ" on the resident phone, the Crown Jewel will look for Direct Commands or Programming and it disconnects the phone line and waits for a command. Some Telephone companies require "#" and "*". FACTORY SETTING: 00 ("##" = Direct Commands; "*** = Programming). 1. Press 2. Enter Alternate Prefix Mode To enter Direct Commands use "##"; Programming use "***" 00 = To enter Direct Commands use a combination of 2 keys (i.e. #* or **); 01 = Programming use a combination of three keys (i.e. "#*#" or "*#*") 02 To enter Direct Commands use "**"; Programming use "***" = To enter Direct Commands use "##; Programming use "##" 03 = 04 Resident will NOT be able to program from their telephone or use Direct Commands = To enter Direct Commands use "[N]#"; Programming use "[N][N]*". 1[N] =([N] = Any number (1-9) on the telephone keypad.) 3. Press EXAMPLE: Sets the Alternate Prefix to enter Direct Commands to "#*" or "*#"; and Programming to "#*#" or "*#*".

Enable/Disable the No-Telco Mode- 33

No-Telco mode is used when a unit is NOT using a phone line. After enabling the "No-Telco" mode, Step #32 -"Reset the Unit" MUST be performed. *FACTORY SETTING:* 0 (Disabled)

Override Telephone Company Answering Service-43

To override the answering service, dial the number attached disconnect the call. After a few seconds redial. The Crown J	to your unit, ewel will ansv	let the phone line ring once or twice and ver immediately. <i>FACTORY SETTING:</i> 20 seconds
1. Press 4 3	EXAMPLE:	4 3 1 5 #
2. Enter Delay Time (1-99 seconds)		
3. Press		Sets the answering service delay to 15 seconds.

Reset/Restore the Crown Jewel Unit

PROCEED WITH CAUTION!

When performing any of the following programming steps, information will be deleted from the system. You cannot retrieve the deleted information unless the information is saved in the CJWIN software.

Reset the Unit - 32

This will reset the unit without disconnect the power. if you MUST reset the unit contact your installing dealer. This may indicate a larger problem with the system or installation.

IMPORTANT NOTE: Once the pound key (#) is pressed the unit will beep once, reset, exit out of the programming mode and beep 4 times.

Restore Factory Settings - 31

When this step is initiated, the relays that were latched (timed or untimed) before this step, will become unlatched. Entry codes and schedules will not be reset.

1. Press	3	

2. Press

Reset System Memory- 31

This will reset the Crown Jewel unit to factory defaults. ALL data will be deleted from the Crown Jewel system. Data will need to be programmed.

1. Press	3
2. Press	
3. Press	#

Erase ALL Transactions - 88

This will erase ALL of the transactions that are currently stored in the system.
